QSR-7KW /32A/ PORTABLE CHARGER

The QSR-7kW/32A portable charger is a portable and practical charging solution for electric vehicles. Operating on a single-phase power supply with 7kW, it can fully charge your vehicle in approximately 6–8 hours. Its compact and durable design makes it ideal for use at home, at work, or while traveling. It offers reliable performance with advanced safety features, providing electric vehicle owners with flexible usage options.

TECHNICAL SPECIFICATIONS

Power Output: 7kW (32A, 230V AC, single phase)

Input Voltage: 220–240V AC (50/60Hz)

Charging Connection: Type 2 plug (IEC 62196-2)

Portability: Compact, lightweight, and easy-to-carry design

Cable Length: 5 meters (other lengths available)

Charging Time: Approximately 6–8 hours (depending on battery capacity)

Protection Class: IP65 – suitable for outdoor use

Safety Features:

Overcurrent protection

Leakage protection (6mA DC detection)

Short circuit protection

Over/undervoltage protection

Overheating protection

Operating Temperature: -25°C to +50°C

Indicators: LED display / charging status lights

Dimensions: Approx. 28x18x11 cm

Weight: ~2.850 kg

Certifications: CE, TUV, IEC 61851, EMC compliant
